MARKET & CONSUMER INSIGHTS

Sisi Zhang

Turning market signals into product decisions.

ABOUT

I find the signals others miss — and I build the tools to find them faster. With roots in IT and both vendor- and brand-side experience, I bring a rare combination: technical depth that amplifies AI and agent-powered workflows, and seven years of commercial acumen honed at Nike, McDonald's, and Burger King. I pioneered agent-driven research that achieves 10× efficiency — not just faster execution, but expanding the frontier of what insights can uncover. The result: whitespace opportunities that launched new product categories, and data narratives that move cross-functional teams to action at VP level.

JOURNEY

From geospatial analytics to AI-powered consumer & product strategy.

2019 — Present

NIKE

Senior Insights Analyst

Pioneered AI-native research workflows since 2023, evolving to Cursor agent-driven data analysis and interactive HTML deliverables, achieving 10× efficiency. Progressed through three roles — location analytics, product insights, and merchandising strategy — with expanding scope and decision influence up to VP-level leadership. Independently owned end-to-end consumer and competitive analysis for Kids and Women's categories: market landscape scans, competitor strategy teardowns, and product-level deep dives, synthesizing internal sales data with external signals (e-commerce, social media, public sources, academic research). Managed full research vendor lifecycle — study design, deliverable quality control, and budget negotiation (up to RMB 1M).

2019

MCDONALD'S

Strategy Planner

Developed revenue forecasting models to predict annual sales potential for prospective restaurant locations, informing site investment decisions for China market expansion.

QSR · LOCATION STRATEGY PLANNING

2018 — 2019

BURGER KING

Assistant Manager, Data Analysis

Built the company's location analytics infrastructure from the ground up: designed and launched a centralized database integrating cross-departmental data into a unified site-selection workflow with automated data routing and approval chains, replacing entirely manual processes. Developed a GIS-based mapping system applying regression and clustering models with business-tailored feature engineering to support site-selection decisions and spatial data visualization.

QSR · LOCATION BASED ANALYTICS

2016 — 2018

ESRI CHINA

IT System Technical Consultant (Product Manager)

Owned the full product lifecycle for enterprise GIS location analytics systems serving Adidas, Starbucks, and McDonald's: requirements discovery, technical and business-logic assessment, PRD authoring, and development oversight through delivery. Approached client needs with a consumer-centric lens — evaluating requirement feasibility and recommending optimal solutions over literal feature requests to ensure system maintainability and scalability.

SELECTED PROJECTS

Insight to impact.

Colorway Study

Analyzed color strategies across runway collections and social media OOTD content to surface trending colorways in casual menswear, womenswear, and sportswear — the company's first AI agent-powered interactive HTML slide deliverable.

Swoosh 1 Pre-Walker Launch

Identified whitespace in toddler pre-walker footwear and built the business case that initiated Nike's first pre-walker shoe program.

Women's Fleece "Drop Shoulder Adoption"

Diagnosed a product structure gap where women's fleece was largely a downsized men's H-shape construction, and demonstrated that drop-shoulder design better aligned with market preference.

The State of Tennis

Decoded the current tennis landscape through three strategic lenses — tournaments, athletes, and products — benchmarking competitors such as Lululemon and Wilson to identify product strategy gaps and inform future direction.

VISUAL STORYTELLING

Insights, crafted to move.

Selected pages from strategy decks and competitive analysis presentations — where data meets narrative design.
